Nilo

Practical and sustainable wooden shell chair

Nilo is a practical and sustainable wooden shell chair in several versions that form a complete family of chairs. Thanks to its simple shape, it has the flexibility to fit into many different spaces, and is ideal for e.g. dining rooms, cafés and meeting rooms.

Nilo is made from FSC®-certified wood, which guarantees responsible forestry with respect to both people and the environment. It is also labelled with Möbelfakta, which ensures that its materials are non-toxic, and that the product complies with the European quality and safety requirements for public environments. This makes Nilo a safe choice. The chair is made of a few parts, all of which you can either recycle, separate or replace - making it a circular and sustainable choice.

The back has a natural springiness that counteracts static sitting and increases blood circulation. The contoured seat provides a comfortable seating, as the user's weight is distributed over a larger area. The seat shell is available in durable laminate, providing durability in especially tough spaces. Nilo is available with handles at the back, which makes it easy to move and support yourself on.

The chair is stackable and available with castors, offering flexible environments and space efficient solutions. It can also be hung on tables, which frees up floor space and facilitates cleaning.

Unit mm, kg.

Functions & options

ARMREST

Nilo can be supplied with soft armrests in black for comfortable pressure relief for the arms. The armrests make it easy to hang the chair on a table. The material in the armrests protects the table surface and reduces noise when hanging.

UPHOLSTERED SEAT CUSHION

The seat can be upholstered with fabrics from Kinnarps Colour Studio, carefully selected to meet stringent quality and durability requirements. The seat adds 5 mm to the seat height.

FULLY UPHOLSTERED CHAIR

Nilo is available in a fully upholstered version for soft and comfortable sitting. Choose from hundreds of colours from our Kinnarps Colour Studio containing many fabrics labelled with e.g. Oeko-tex and the EU Ecolabel.

CASTORS

Castors are available as an option for chairs with four-legged underframes. Castors provide easy movement and make it easy to push close to the table. Choose between braked and unbraked castors. Nilo on castors meets the requirements of EN16139.

BACK HANDLE

Nilo is available with a practical handle in the back, which makes it easy to move and support yourself on.

CONNECTORS

For lateral linking of Nilo with 4-legs or sledge. The bracket is easily attached to/unattached from the chair.

SUSPENDABLE

Can be hung on tables, which frees up floor space and facilitates cleaning. The soft armrests protect the table surface and reduce noise when hanging. Can also be hung without armrests by flipping the chair.

STACKING PROTECTION

Practical stacking protection for use when stacking fully upholstered Nilo chairs or Nilo chairs with an upholstered seat.

FELT PAD

Add felt pads for chairs placed on hard flooring; they will reduce scraping and provide a quieter acoustic environment.

Functions & options

STACKABLE

Nilo is easy to stack, which creates changeable environments and provides space-efficient solutions. Use optional stacking protection for chairs with upholstered seats or a fully upholstered design.

STACKING TROLLEY

Nilo can be moved with a stacking trolley. The trolley on castors is easy to manoeuvre (two castors are lockable). Space for up to 30 chairs.
