

## The modular and creative solution

The modular Fields range offers a creative solution for every space. The modular design allows you to create different types of combinations that can be customised if your needs change. The range consists of coffee tables, meeting tables, armchairs, pouffes, sofas, storage units and accessories. A flexible range that accompanies you throughout your working day, supports the different activities you perform and offers different functions all in the same space.

With its versatility, it encourages movement and variation throughout the day. Choosing a location according to the type of activity enables a natural flow to be created. Switch between sitting and standing, take a break on a sofa or in an armchair, work at a higher meeting table or hold active meetings, where you stand instead of sitting. The high backs in the Fields range create "room-within-a-room" solutions for privacy and concentration. The aim is to achieve wellbeing and good ergonomics.

It is also sustainable in the long term, as it can be rebuilt or updated if needs or spaces change. The modules have a common design style for a consistent look. Choose fabrics and materials from Kinnarps Colour Studio. Our range of materials with its easy-to-match colour palette and timeless profile makes it easy to choose the right material and colour for the right place and activity.
