

## Classic task chairs with infinite options

Plus is a classic in ergonomic design – a success story that has sold more than two million units. An elegant task chair with timeless, slender shapes that fit in with the most diverse environments – from ordinary offices to laboratories and tough manufacturing environments. Plus offers two mechanisms: FreeFloat™ or Synchrone™. Synchrone™ is a mechanism that allows the seat and backrest to move in a soft and balanced way in relation to each other, and is ideal for users who want active and controlled sitting. FreeFloat™ is a mechanism that encourages movement and contributes to frequently changing working positions. The seat and backrest follow the movement of the body, independently of each other. With a focus on natural movement and active sitting, Plus offers fantastic flexibility and infinite options. Add adjustment options for seat depth, sitting height and backrest height and you get an ergonomic favourite. Choose between different back heights, armrests and headrests. You can also add contrasting stitching or your own logo.

## Functions & options

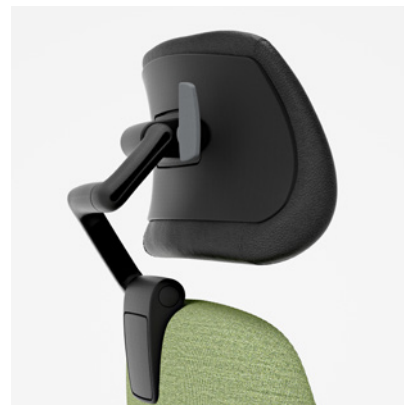

### ADJUSTABLE BACK AND LUMBAR SUPPORT

Allows individual adjustment for the lumbar spine. The mechanism is located on the back of the chair.

### SAFEBACK

Guarantees a safe return to an upright position when the chair has been locked in a reclining position.

### HEADREST

The headrest is articulated, capable of independent movement: vertically adjustable, and the angle can be changed forwards and backwards.

### ARMREST 2

Width and height adjustable. Soft padding on the upper side provides comfort for the arms and shoulders.

### ARMREST 4

With its extra soft and comfortable surface, the armrest provides optimal support and pressure relief without locking the arm in one position. Adjustable depth and angle in relation to the body.

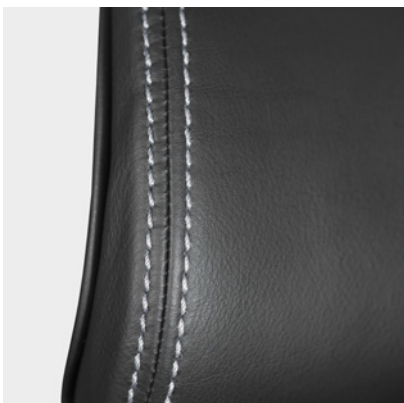

### LOGO

Add your own company logo to the backrest.

### MOTIF

Characteristic stitching across the seat and back, also available with contrasting fabric all around. Extra padding provides even better and softer seating.

### CONTOUR

A detailed seam in black, white or silver grey thread. For chairs upholstered in leather.

### SOFT

All chairs (Plus 6 and Plus 8) are available with extra padding on the seat and back, providing softer seating. This increases the seat height of the chair by 10 mm.

**CASTORS FOR HARD OR SOFT FLOORS**

They roll easily when loaded and brake slightly when the chair is unloaded.

**FOOTRING**

Chairs with the higher gas springs can be fitted with a footring to comfortably take the pressure off your legs and feet. The height is variably adjustable.

**EXTRA HEIGHT GAS SPRING**

Two gas springs offering additional height (KGAS80 = 48-67 cm and KGAS190 = 59-86 cm) are available as options.

**GLIDES**

The glides replace the castors when the chair is used with a 270 mm gas spring.

**FIVE-STAR BASE**

Ergonomically designed five-star base with marked support surface for the feet. By resting your feet on the star base, you take the pressure off the back of your thighs to create a restful position. Available in black, silver and polished aluminium.

**PLUS 6 – FREEFLOAT™**

FreeFloat™ is a tilting mechanism that encourages movement and contributes to optimal, ergonomic working positions. The seat and backrest follow the movement of the body, independently of each other. The seat can be tilted forward and the chair's level of resistance is automatically customised to your body weight. Adjustable depth, seat height and backrest.

**PLUS 8 – SYNCHRONO™**

Synchrono™ is a tilting mechanism that allows the seat and backrest to move in a soft and balanced way in relation to each other and is ideal for users who want active and controlled sitting. The level of resistance is adjusted manually and the seat can be tilted forward and locked in the desired position. Adjustable depth, seat height and backrest.

## Colours & materials

Kinnarps Colour Studio (KCS) is our range of materials for offices, schools and healthcare facilities, with a focus on sustainability, quality and harmony. It offers attractive materials that have been carefully tried and tested for suitability and sustainability in different types of spaces. The wide range makes it easy to find the look and functionality you want. Wood, metal, plastic, and textiles, colours and patterns that are easy to mix and match with each other and the rest of the interior design. A well-thought-out range that provides a harmonised and sustainable overall impression, and makes it possible to choose the right material and the right colour for the right place and activity.

**Seat/back** Fully upholstered. Choose any fabric from Kinnarps Colour Studio.

**Armrest** Black finish. Option: Armrest 4 with polished detail.

**Headrest** Choose any fabric from Kinnarps Colour Studio. Option: polished cover.

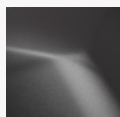

**Five-star base** Black plastic five-star base with 5 castors for hard and soft flooring. Option: Polished or silver aluminium five-star base and glides (black).
