

A stool for almost any room

The Frisbee stool is versatile, with a simple design that is suitable for education, office and healthcare environments. It is lightweight, which makes it easy to move around according to the different needs and activities of the day, providing space-efficient and flexible interior design solutions.

Frisbee is available in three different heights to ensure the correct ergonomic position for different table heights. The two higher stools are equipped with a footrest for comfortable support. The stool without a footrest is stackable, which makes it easy to store away. The seat is easy to replace when needed, and provides a circular product that can be maintained over time. The stool has a simple design that can be placed anywhere and fits into most spaces, which also ensures a long lifecycle. Choose from plastic glides, which are ideal for furnishing spaces with soft flooring, or felted glides that reduce friction and dampen sound against harder flooring.

Frisbee is quality and safety tested in accordance with the European requirements for public environments, EN16139. This results in a durable product with a long lifecycle. The stool has a metal frame, as well as either a wooden or fully upholstered seat. Create your own look by choosing between several different colours from our Kinnarps Colour Studio, which contains quality-assured fabrics, materials, and colours adapted to different spaces.
